TRENCH GRATES AND FRAMES

Patent Products "Trench Grate and Angle Frame" is the simplest, neatest, most economical and best engineered way of making a drainage waterway requiring a traffic grate cover. The galvanised angle frame is specifically designed to give maximum opening and, when set into concrete, provides a strong, solid base for Patent Products grates to rest on. Installation is simple. Position the box forms so the distance across the outside is the same distance as the inside of the selected grate framing. Nail the framing to the boxing over the cross bars of the frame. On completion of the work, simply cut off enough cross bars to remove the boxing.

| Product Code No | Clear Opening | Grate Width | Grate Depth | Angle Frame |
|-----------------|---------------|-------------|-------------|-------------|
| PP TG 101 075 L | | 75 | 25 | |
| PP TG 101 100 L | 75 | 100 | 25 | 30 x 15 x 3 |
